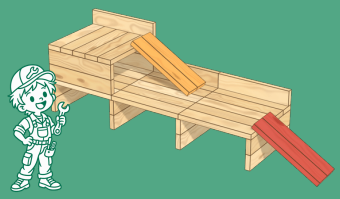
Car garage

Difficulty :

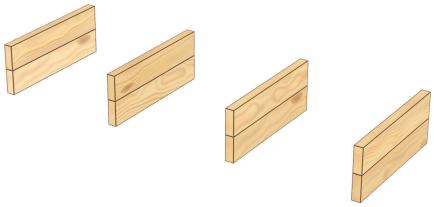
Pieces : ~39

Age : +4

Duration : ~15 min

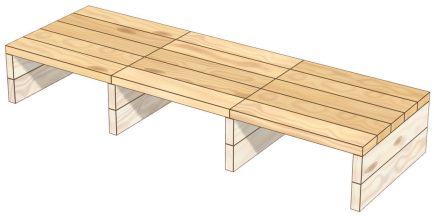


1



Lay 4 planks on their edge, parallel, almost a plank's length apart. Stack a second plank on each one: these are the walls of the three bays.

2



Cover the walls with 15 flat planks, in three rows of 5. This floor is the roof of the bays and the terrace for what comes next.

3

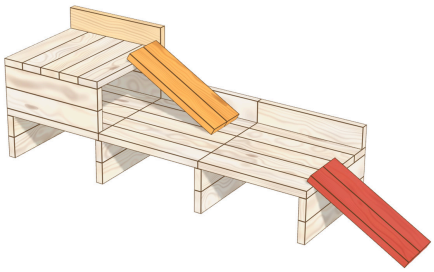
On the left end of the floor, lay 2 planks on their edge, one at the front and one at the back, then a second one on each. At the back of the terrace, add 2 planks on their edge: this is the railing, the barrier that stops falls.

4

Lay 5 flat planks across, from one wall of the upper floor to the other. The floor stays open on the terrace side: that is where the car drives in.

BRAVO!

5



Add one plank on its edge at the back of the roof. Lean 2 red planks on the right end of the terrace, at the front, the other end on the ground. Then 2 yellow ones from the roof down to the terrace, at the back.
